Contents

Thematic Issue on Continuum States of Atoms and Molecules

Editor: N.S. Scott

Preface xi

CCP2: Background and Research Achievements 1978–1998 xii

Contents xviii

Smyth, E.S., J.S. Parker and K.T. Taylor
Numerical integration of the time-dependent Schrödinger equation for laser-driven helium 1

Collins, L.A., J.D. Kress and R.B. Walker
Excitation and ionization of molecules by a single-mode laser field using a time-dependent approach 15

Colgan, J., D.H. Glass, K. Higgins and P.G. Burke
The calculation of molecular multiphoton processes using the *R*-matrix-Floquet method 27

Potvliege, R.M.
STRFLO: a program for time-independent calculations of multiphoton processes in one-electron atomic systems. I. Quasienergy spectra and angular distributions 42

Plummer, M., J.F. McCann and L.B. Madsen
The calculation of multiphoton ionization rates of the hydrogen molecular ion 94

Morgan, L.A., J. Tennyson and C.J. Gillan
The UK molecular R-matrix codes 120

Rabadán, I. and J. Tennyson
ROTIONS: A program for the calculation of rotational excitation cross sections in electron–molecular ion collisions 129

Sanna, N. and F.A. Gianturco
Differential cross sections for electron/positron scattering from polyatomic molecules 142

Bartschat, K.
The R-matrix with pseudo-states method: Theory and applications to electron scattering and photoionization 168

Sunderland, A.G., J.W. Heggarty, C.J. Noble and N.S. Scott
Parallelization of *R*-matrix propagation methods on distributed memory computers 183

Heggarty, J.W., M.P. Scott, N.S. Scott and P.G. Burke
Computational aspects of the two-dimensional propagation of *R*-matrices on MPPs 195

Burke, V.M.
A new method for calculating angular integrals in electron–atom scattering 210

Quigley, L., K. Berrington and J. Pelan
The QB program: analysing resonances using R-matrix theory 225

Stibbe, D.T. and J. Tennyson
TIMEDEL: A program for the detection and parameterization of resonances using the time-delay matrix 236

Busby, D.W., P.G. Burke, V.M. Burke, C.J. Noble and N.S. Scott
VisRes: a G*R*ACE tool for displaying and analysing resonances 243

Maley, D., I. Spence and P. Kilpatrick
Config: A G*R*ACE tool for constructing configuration trees 271

Eissner, W.
The UCL distorted wave code 295

Schultz, D.R. and C.O. Reinhold
Elastic – Elastic scattering of electrons from ions and atoms 342

Bray, I.
Calculation of electron- and photon-impact ionization via a close-coupling approach 356

Mitnik, D.M., J.A. Shaw, M.S. Pindzola, D.C. Griffin and N.R. Badnell
Electron-impact ionization of Fe^{14+} and other atomic ions in the Mg isoelectronic sequence 368

Rasch, J., C.T. Whelan, S.P. Lucey, C. Dal Cappello and H.R.J. Walters
6-dimensional integrals and supercomputers 378

Nesbitt, B.S., S.F.C. O'Rourke and D.S.F. Crothers
Ion-Atom-Wave – Calculation of single ionization cross sections in ion–atom collisions 385
